	Patients	preventive health care (activity (i) of schedule VII of the Companies Act, 2013)	[Medical Research Foundation-Sankara Nethralaya]			Year 2021-22	Ultra Wide field imaging system. As the retinal pathologies above 110 degree are not reachable to capture with the conventional fundus cameras, the Optos California Ultra Wide field imaging system which is capable of capturing the 200 degree of field of view of retina (82% of Retina) in single image within a second will be very helpful. During COVID time, this device will significantly reduce the patient waiting time in the hospital and also help in safe acquisition of the images without risk to the patient or the staff. Screening will be provided free of cost to the underprivileged patients. Further, screening charges, if any, recovered from regular patients shall be ploughed back and utilized for providing free eye surgeries to poor patients.
